

Lecture Code Walkthrough

During this lecture you will building out an application that lists out product reviews for our book, Cigar Parties for Dummies. When you are done with this application it should look like this.

Product Reviews for Cigar Parties for Dummies

Host and plan the perfect cigar party for all of your squirrely friends.

Malcolm Gladwell

★★★★ What a book!

It certainly is a book. I mean, I can see that. Pages kept together with glue (I hope that's glue) and there's writing on it, in some language.

Tim Ferriss

★★★★ Had a cigar party started in less than 4 hours.

It should have been called the four hour cigar party. That's amazing. I have a new idea for muse because of this.

Ramit Sethi

★ What every new entrepreneurs needs. A door stop.

When I sell my courses, I'm always telling people that if a book costs less than \$20, they should just buy it. If they only learn one thing from it, it was worth it. Wish I learned something from this book.

Gary Vaynerchuk

★★★★ And I thought I could write

There are a lot of good, solid tips in this book. I don't want to ruin it, but prelighting all the cigars is worth the price of admission alone.
