MEME GENERATOR - REDUX

We will write the controller methods to provide an API which will call methods in the provided MemeGeneratorService to get the meme list and create memes.

Step 1:

Create the methods in the MemeController class in the API

Step 2:

Complete the code in the MemeService in the Vue code

Step 3:

Create the route to the Home compenent

Step 4:

Complete the code in the MemeList component. (You will need to create a route to the CreateMeme view to complete this step.)

Step 5:

Complete the CreateMeme view (You will need to create a route to the MemeResukt view to complete this step.)

Step 6:

Complete the MemeResult view
